PR. 4: Declaration of rights; government for the people; equality of rights

Patrick Finnie

Why did you people delete any mention of religious inequality? Its deletion is so glaring that I know it is an intentional omission. Do you people feel that "sexual orientation, gender identity, gender expression, are more important to protect than religious expression? Do you understand what this omission says to and about your opinion as it relates to religious import? Restore the importance of religious freedom and respect to it's rightful place in the Vermont Constitution.
