

Dear Senator Bray and Congressman Bongartz,

I hear that some are saying the present wording of S-100 and H-68 is OK with South Burlington. *It most definitely is **not OK**.*

As it presently reads it would run roughshod over more than three years of intensive work this city put into protecting our environment and natural resources and assuring we have the housing needed for the future as well as affordable housing.

As the nominal committee charged with looking after our natural resources I ask you humbly to carefully consider that our city council and staff have already written to the originating committee of S-100 pointing out its shortcomings and suggesting language that could be added in the bill to ease our concerns.

Respectfully,

Ray Gonda

South Burlington
