

Habitat for Humanity & Randolph Technical Career Center

2023-2026

Habitat House Fact Sheet:

- Number of families living at the Randolph Habitat for Humanity House: 2
- Number of months to complete project: 18
- Number of students who participated: 20 to 30 - including some hands-on time with the Electrical Technology program.
- Average days per month: 3

Main Tasks that RTCC Students Participated In:

Setting insulation for the concrete slab, shed-building, sheetrocking, window and door trim (finish work), extension jambs for windows, etc.

Their experience was hands on with the full spectrum of home building.

Collaboration that Benefits the Community

Career Connection

One of RTCC's Construction Technology students had the opportunity to do a full Co-op and also work through the summer for Habitat for Humanity.

How do RTCC and Habitat for Humanity Mutually Benefit from this Collaboration?

- This project fills a need in the community to provide housing for homeowners who might not usually have access.
- It provides an opportunity for students to be a part of working on a project that real people will enjoy and live in.
- This collaboration provided access to additional workers to assist in Habitat's mission as they completed their project.

How does this collaboration support students as they apply for positions in the Construction field?

Working on a real-world project that families will live in provides many opportunities and experiences beyond the skills gained within the classroom.

On-Site Hands-On Experience

Important Lessons that Students Learned Because of this Collaboration:

- The process of building a house from the ground up
- Problem solving issues that came up during the course of the build
- Working through scheduling interruptions
- Managing the overall budget of a project
- Marking and measuring sheetrock
- Teamwork skills and collaboration

The Habitat for Humanity House Supplemented

Student Learning at RTCC:

This experience gave students real world experience of how a job site is run and some of the problems and issues that might arise while running a job site along with how other tradespeople flow through the instruction site.

Additionally...

This year's RTCC students completed the assembly of 2 sheds for each duplex!

Number One Positive Outcome of Student Participation in a Build that will House Residents in our School District:

PRIDE! Students were proud to be part of a project that
would be lived in and enjoyed
by the owners for 100+ years.

Why has RTCC chosen to collaborate with Habitat for Humanity on their next project?

RTCC is fortunate to be local to Habitat's next project. We want our students to continue to benefit from this partnership!

The Collaboration Continues with our next project:

RTCC and Habitat for Humanity:

804 N. Main Street

Northfield, VT
