Technical Documentation: Vermont School District Builder

1. Project Overview

This is an interactive, single-page web application for creating, visualizing, and analyzing custom school district maps for the state of Vermont. It allows users to group towns into districts, view real-time demographic and financial data for those districts, and export their work in various formats.

2. Technology Stack

The project is built using the following:

- **Framework:** [React](#) (v18.3.1)
- **Language:** [TypeScript](#) (v5.4.5)
- **Build Tool:** [Vite](#) (v7.0.5)
- **Styling:** [Tailwind CSS](#) (v3.4.4)
- **Mapping:** [Leaflet](#) (v1.9.4)
- **Charting:** [Recharts](#) (v2.12.7)
- **State Management:** Native React Hooks (`useState` , `useEffect` , `useCallback` , `useMemo`)
- **Data Compression:** [pako](#) (v2.1.0)
- **Image Export:** [html2canvas](#) (v1.4.1)

"Copy Shareable Link" is the easiest way to send the map to others so they can view it interactively. Generates a long URL with a string of characters that act like a blueprint.

"Export CSV assignments" creates a file on your computer. When you want to resume working later, select "Import assignments" in the menu to load that file back in and pick up where you left off.
