

My name is Wendy Fogg-McIntire I am a para educator at Rivendell Academy, part of the Rivendell school district which is a bi state school district. The two elementary schools are in West Fairlee and Fairlee Vermont. The academy is in Orford NH. I primarily support students with IEPs. I have worked at the Highschool for twenty one years. I love my job and the students. Over the years I have supported the students in many ways. I have gone to gym classes, supported students in music classes, and helped students dissect frogs in Biology. Last year I was in a Community classroom with students who needed more support and went on a memorable field trip to a farm where we ended up hiking through a sheep field and straight up a hill, with a beautiful view at the top and proud students who made it up. This year is not quite so exciting, but I am supporting students with academic needs. I love watching all the students grow from young middle school students to confident seniors. Even though our school is small everyone I work with is dedicated to our students and to making sure that they are successful and prepared for life after school. Thank you Wendy
