Subject: H.125

Good morning, Reps. James and Sibilialia.

Here are some suggestions for possible H.125 language, including a set of indicators. (Please note, the last of the suggested indicators around economic output is important, but not quite complete.) I would be pleased to discuss further if this approach is of interest to you and your committee.

Best,
Julie

- a. On or before December 15, 2025 the Agency of Natural Resources, in consultation with relevant state agencies including the Department of Public Service, Agency of Transportation, Department of Labor, Agency of Commerce & Community Development, and Department of Taxes, shall publish a report which highlights existing data sources and indicators relevant to the impacts of the clean energy transition on Vermonters.
- b. The report shall include:
 1. Current electric rates and forecast electric rates
 2. MW distributed solar
 - a. Installed (5-year trend)
 - b. Active CPG applications
 3. Heating fuel sales (5-year trend)
 4. Homes weatherized (5-year trend) by income quintile
 5. Firms and workers in thermal sector trades (5-year trend)
 6. Transportation fuel sales (5-year trend)
 7. Progress in EVSE installation (DCFC and Level 2) to meet recommendations in the Comprehensive Energy Plan and Climate Action Plan
 8. Vehicle registrations (light, medium and heavy-duty)
 - a. EVs (new and used)
 - b. Gas
 9. [broad economic indicator]
 - a. Fossil fuel consumption per unit of economic output?
- c. The report shall also include:
 1. An assessment of data gaps necessary to illustrate the impacts of the clean energy transition,
 2. An identification of existing reports/requirements that may support the reporting of relevant indicators,

3. Consideration of equity and just transition indicators, with the goal of better understanding the benefits and burdens of the clean energy transition,
4. Any recommendations for future reporting requirements.
