

4/14/2026 – Louis Porter/Washington Electric Co-Op

Alex,

I am, of course, willing to come in if the committee would find it helpful. I have to tell you that I don't know that much about appliance efficiency, as appliances are typically member-owned equipment that a distribution utility like Washington Electric Cooperative doesn't have much to do with. If helpful, feel free to put this letter into the record that WEC has no objection to the bill, appreciates the opportunity to testify, but does not need to spend the Committee's time unless they would like us to come in.

Thanks,

Lo
