

Dear Alex Michalka,

My name is Dana Caspersen, I am a resident of Kirby, Vermont. Vermont has been a leader for the whole country in so many issues, and I believe it is vital that the state take a long-term view on the necessity for renewable energy systems. When we bring down the cost of solar, we widen its base of support and it will be a virtuous cycle moving us toward more energy independence and a healthier environment.

I support H.716 to make solar more affordable for more people in Vermont, to offset the loss of a 30% federal tax credit for home solar, and prevent the VT Public Utility Commission from decreasing the compensation Vermonters receive for new net metering for the 8th time in 9 years.

I would like my email be part of the public record in support of this bill.

Best, Dana Caspersen
