

Dear VT House Energy & Digital Infrastructure Committee members,

As a family of 8 and with a home healthcare business where an average of 32 individuals come to our home for holistic Physical Therapy services weekly, we have been pleased that there has been an OPT OUT option for the use of smart meters. As with any technology there are benefits and risks and we strongly urge you to please make legal protection and provision for us to be able to freely, without added charges, be able to OPT OUT of smart meter usage as an extra measure that we prefer to ensure the utmost safety of all within our home.

Thank you!

Sincerely,

Anthony + Krista Tomaselli & family
