

Dear VT House Energy & Digital Infrastructure Committee,

I'm writing to ask that you don't fall prey to the lobbyists.

Please vote for no fees to remove and / or to not have a smart meter on our homes or businesses in our state of Vermont.

It needs to remain free to remove them.
And free to not have them going forward.

They are dangerous to our health and can be a cyber security risk as well as it is possible in certain instances to get hacked through them.

But most of all it is the health issues they create. Cancer is worse than a hack.

Please don't let the lobbyists win this one. I know they have more power than this simple email but we are hoping you can do what's right.

Thank you,
Wynne Patterson
Pittsfield, Vermont
