

Follow up testimony, Ethan Hinch, Office of Bernie Sanders

Here's a link to the Energy Information Administration's website documenting electricity prices - https://www.eia.gov/electricity/monthly/epm_table_grapher.php?t=table_5_03

The average residential electricity price in January 2025 was 15.94 cents per kilowatt hour. In August, the most recent month for which there is data, the average residential electricity price was 17.62 cents per kilowatt hour. That is a 10.5% increase from 15.94 cents in January when Trump took office to 17.62 in August (again, the last month for which we have EIA data).

I also wanted to provide the link I mentioned to the Lawyers for Good Government's Fund Protection Clinic - <https://www.lawyersforgoodgovernment.org/fund-protection-clinic>
