Emailed testimony from Kathleen Bower April 1, 2025

My name is Kathleen Bower. I live in Weston Vermont. I am asking you to urgently support this bill and work to move it through the process to become a law as quickly as possible! Time is not on our side. The scientists that have researched chemtrails for decades have been sounding the alarm for decades! Our planet and everything on it is in devastating decline.

I have been aware of chemtrails/geoengineering since 2003. I moved to Vermont six years ago from a rural flat area of New York. Now I have a bird's eye view from my Vermont mountain home. I came to retire in the beauty of nature, but nature is in serious trouble. I have watched a tree die off in New York and I am seeing it now in Vermont. The maples are in distress and many pines as well along with all the creatures that inhabit our environment. I read recently that nearly 80% of our insects have been lost.

I have been keeping a photo record of the sky in Vermont that is very disturbing with multiple planes creating XX's, Grids and Arrows on clear blue days that turn to hazed grey days. These phenomena go on endlessly and they do not stop at night. They fly at lower altitudes!

Over the years, I have called the Airforce, Air Guard and Airports in a 100 mile radius. I have also called the EPA, DEC and Health Departments to no avail.

It has only been very recently that I have found other concerned citizens (Kennedyj supporters) willing to discuss this issue. It is very strange that my 5-year-old grandchild notices the planes and the spraying and points them out. It is heartbreaking to have to tell her she is not allowed to eat snow. We owe the children a chance to inherit a healthy world!

This is a global initiative right now! People are rising up against the insanity of weather modification and a secret plan to reverse "climate change". You can be part of the generation of law makers to the SAVE THE EARTH!!

 PLEASE MAKE GEOENGINEERING STOP. AS OUR ELECTED OFFICIALS, YOU CAN DO THIS! THANK YOU.
