

Hadeka Stone Corp.  
PO Box 1506 ~ 460 Staso Road  
Castleton, Vermont 05735  
802 468 5472 ~ [hadeka3@gmail.com](mailto:hadeka3@gmail.com)

Hadeka stone Corp. is situated on 85 acres of industrial zoned property at 460 Staso Rd in the town of Castleton, Vermont. This property has been operating as an aggregate producer since 1911. Since that time, there has been no cessation of activity grater then a four (4) month interval. The Hadeka family purchased the property (Staso Milling Corp.) in 1976 and shortly after began processing and packaging stone products for various uses. We continued the process of stone extraction via drilling and blasting quarry rock at the Staso Road location (which began over 100 years ago). We package the crushed material not only from our Castleton location but material brought in from our Hampton, N.Y. quarry. We also package other aggregates transported in from other sources to create a wider product line for our customers. This activity has been ongoing at the Hadeka location since 1978. Similar activity had been on going at this same location since the early 1900's.

In 1978 we began recycling waste products that remained on the property from previous operations. We dry, crush and screen waste slate tailings making products used in clay tennis court construction and baseball infields. We also package a full line of decorative landscape stone. We have no waste stream and we recycled before it became the environmentally appropriate thing to do. There are no mountainous piles of slate tailing on our property.

We have and will continue to be a caring and environmentally conscious business entity in this community. The well being and quality of life of our surrounding neighbors has always and will continue to be a priority. If any of you have questions regarding our business operation please contact us. We would be extremely happy to answer any questions or concerns that you may have. If you would like to make a site visit, we would welcome that oppportunity to show you, our operation.
