

Southview Development Richmond, VT

Yellow Area indicates the state says it needs a 3-acre stormwater permit. The state has drawn an arbitrary boundary that includes only SOME of the lots in Southview. Green lots in Southview have been told they DO NOT need permit. Yellow Lots told they DO need permit. Approximately 48 lots of the 72 lots have to pay for the permit.

According to the State, the stormwater design has to “accommodate” for stormwater from the lots that don’t have to participate (green lots), which are all UPHILL from the lots that have to pay (yellow lots).
