"There is a pollution budget for the lake.... We determined that we did not need to regulate subdivisions that never had a stormwater permit in the past, regardless of how large they were, because just pulling in the previously permitted subdivisions, along with the other approximately 700 3-acre sites... we determined that that would be sufficient to meet our water quality goals... so we did not feel that it would be necessary to regulate other impervious surfaces... we restricted it to that definition." @ 48:48

"We have an obligation to see that these requirements are met, and we know not everybody likes them, but it often is what it is." – ANR employee @ 57:44

"There is an element of unfairness of this. I understand that, but there has to be some regulatory line." – ANR employee @ 1:20
