

Good Evening,

I would like to express my support for the amendment introduced by Representative Stone to S.64. Though not perfect, this amendment is a step in the right direction and significantly increases the training and oversight requirements for advanced procedures. As I testified in your committee a couple of weeks ago, S.64 (especially without this amendment) does not require proper training and the extensive oversight required to develop surgical judgement and skill necessary to ensure safe eye surgery for Vermonters. Please consider this amendment.

Thank you,
Jeff Young
