

Dear House Government Operations Committee:

I write to ask you to consider supporting Representative Mary Katherine Stone's amendment to bill S.64. The suggested amendments are sound, giving optometrists the ability to expand care for their patients while assuring patient protection. This amendment should be a win-win for eye care providers and patients. I am personally willing to take a role suggested for ophthalmologists to assist with mentoring/supervising our optometry colleagues.

Sincerely,

Peter
