

Members of the House Government Operations Committee:

Please vote to approve the amendment to S.64 regarding Optometry scope of practice requiring more training and collaborative practice. I really feel that extending surgical practice to persons not trained in surgery represents a danger to the people of Vermont. I receive and greatly appreciate the care offered to me by my optometrist, but I would not choose to have him operate with the minimal additional training allowed by the bill as it stands without amendment.

thank you
