

## Testimony on Universal Primary Health Care

I've been a member of the League of Women Voters for 30 years because they support a healthy democracy with not only voting rights but also the need for universal health care. H.433 for universal primary care in Vermont will give everyone access to a primary care doctor which will help to keep us all, no matter what our income is, a lot healthier. I'm fortunate to be on Medicare and realize that being able to access health care at a Federally Qualified Health Center has kept me healthy in spite of the usual issues with aging. Let's give everyone the opportunity to grow old!
