

Sorry for the technical problems in my testimony - the slate roof in my apartment house doesn't allow for good zoom meetings. Unfortunately, it's hit or miss and it was missing today.

I wanted to say that I am very much for Universal Primary Care and wanted to point out that I have the "Healthcare is a Human Right" bumper sticker on my car. I also wanted to echo the comments that primary care is preventative and the phrase you can pay me now or pay me later is applicable here.

I would have possibly said not doing it is penny wise and pound foolish.

It's a great 1st step and I thank the committee for hopefully going forward.

Ken Fay
