

Please advance S.197 to provide primary health care for every resident of Vermont just as is done in Norway and many other countries. This will actually reduce the cost of health care in the state because having a primary care contact with at least an annual visit will prevent a lot of us from getting sick.

It will also help young families with their cost of living in Vermont. We need a younger population! Jean Hopkins

Let's take concrete steps this session to make Universal Primary Care a reality.
