

Dear House members:

You have the power this year to do something bold.

Please add an amendment to S.197 that will create a Universal Primary Care Advisory Group to work on a financing and operational plan for universal publicly financed primary care, based on up-to-date cost estimates of primary care spending. This is critical for health reform.

Your constituents don't want their schools closed.

BOLD health reform will protect our schools.

Lise Anderson

Cornwall

Help us do this!

Take the first step to make Universal Primary Care a reality.
