

I am writing to urge you to take steps to protect Vermonters' access to primary care by avoiding a funding cliff prior to adoption of the ahead model. It is already hard enough to gain access to primary care. Monthslong waiting lists, even for folks like me who know the number to the back line. Simply subtracting money from the system will worsen that problem and slow the health system benefits from later adoption of AHEAD.

Thank you for considering it, and for your service!
