

## ABOUT THE COALITION

In 2024, three Vermont professional nursing organizations came together to form a coalition to align nurse practice priorities and join in advocacy initiatives for health policy.

Legislators are encouraged to contact the American Nurses Association-Vermont, Vermont Emergency Nurses Association, and Vermont Nurse Practitioners Association to access the expertise of our professional nurses when decisions about nursing practice and healthcare delivery are being made.

Established in 1914 as the professional association for nurses in Vermont, ANA-Vermont has a long history of supporting nursing practice at the state and national level. ANA-Vermont currently represents the more than 14,000 RNs and LPNs that are licensed to practice in the state.
