Subject: High End System of Care Data

Chair Wood and members of the Committee,

We appreciate the time and thoughtful care your Committee applies when examining a system as important as the high-end system of care. We remain available to answer any questions or provide additional information as requested to support the Committee's understanding of the high-end system of care and future projects.

As a follow-up to that discussion, we are submitting the requested data related to the high-end system of care. If it would be helpful, we are also happy to provide this information in an accessible Excel spreadsheet format via email, for ease of review and use.

* Programs sometimes cannot serve the number of residents that their license allows for. Commonly cited causes for this reduced capacity includes insufficient staffing, increased acuity of resident needs, or both. These numbers reflect point in time count of currently available beds.
