

**Restricted Driver License:**

- **Statute:** 23 V.S.A. §1213
- **Rationale:** An ignition interlock device detects alcohol but not drugs. To allow someone who only has DUI – drug charge(s) defeats the intent of the program.
- **Language:**  
(b) An individual who only has a DUI – drug charge, and no active DUI- alcohol charge, is not eligible for an ignition interlock RDL or ignition interlock certificate.
