State Facilities Electric Vehicle Charging

The Energy Office installs and maintains electric vehicle (EV) charging stations at state buildings. Our goal at the Energy Office is to provide convenient, reliable, and accessible EV charging. Whenever there are changes to station rules, features, or new stations, we'll update this page. We value your feedback and involvement as we work to reduce transportation emissions and increase charging station access across Vermont!

Zoom in and click on the icons to see the location, street address, and station count.

Recent Updates

The charging stations located at 136 State Street, Montpelier have been replaced and are now usable again.
