

- Has ADS developed a plan for continued access to the historical data. Can you provide plan details?
- Is there any update on whether AOT MATS will be replaced with WorkDay?
- During previous testimony, it was hinted that WorkDay might provide an enhancement specifically for State implementation in the Spring release. Do you have any additional information about this, which functionality it would add, and if they have agreed to provide this?
- During discovery has ADS worked with each branch for both their functional and non-functional requirements? Has this lead to any increase in scope and/cost?
- What is the current status of the project? Are we on track to the project plan?
- Has ADS spoken to the state of Maine to discuss their Workday implementation and the lessons learned? If so, what lessons learned can be shared?
- Due to the recent VTHR outage coupled with significant cloud service provider outages, what is the contingency plan to provide HR and finance services to agencies/branches of government in a situation where Workday may be down? Do we keep a copy of all of our data somewhere not in the Workday cloud to provide continuity of services?
- Have all current integrations with VTHR and VISION been mapped? Is there a plan to update those integrations in Workday to modern systems that do not use SFTP, such as API's?
