

Chairs Emmons, LaLonde, and Lyons,

As requested at last week's Joint Justice hearing, attached you will find a table representing all state detainees and their corresponding bail amount set by the courts. The Crime Research Group also recently reported on longitudinal bail data:

<https://crgvt.shinyapps.io/bail/>

I also wanted to confirm that the median length of stay for State detainees in 2025 (so far) is four days. For ICE detainees, the median length of stay in 2025 is six days. This is double that from 2023 and 2024, where the median length of stay was three days. This information is also represented in the attached graph.

The third attachment represents the number of unique individuals held by ICE from 2023-present.

If you have any additional questions don't hesitate to reach out, and you're welcome to distribute this information to the other committee members as you see fit.

Best,

Haley Sommer (she/her)
Director of Communications & Legislative Affairs
Vermont Department of Corrections
