

My testimony is as follows:

Starting approximately twelve years ago, I noticed the effects of wireless technology as I approached Montpelier from Calais, right about at the Morse Farm. Each week I noticed more and more people with cell phones in their hands until it seemed there could be no more.

My energy level would drop to a great degree making it very hard for me to work in a wireless environment. I ended up having my thyroid tested and I was auto-immune. I discovered that many other people were having thyroid issues, people in their twenties. My son had a job doing inventory which required wearing a blue tooth device on his finger and attached to his belt. His thyroid crashed, completely crashed, so he had to quit his job at which point his thyroid starting returning to normal.

Very much research was available to show the damaging effects of wireless technology and I started gathering data. The following link has a huge amount of information that confirms this situation that was nearly unbearable to my system. It is a [bit.ly](https://bit.ly/2EEPQCM) file: [BIT.LY/2EEPQCM](https://bit.ly/2EEPQCM). Contained in this link are declassified documents released by Magda Havis, papers by Martin L. Pall, BA Ph.D, Professor Emeritus. Washington State University, Biochemistry and Medical Sciences (one of his papers is the **Journal of Chemical Neuroanatomy 75(2016)43-51**), Barrie Trower, Microwave Scientist for the U.S. government (the cooking of humanity, invisible global warfare), Devra Davis (cell phone radiation, the damaging effects, what the industry hides from us), the U.S. Navy, 208 Scientists Appeal to the U.N. for better safety standards, a Calais doctor posting on PPF - Resonance Video: vimeo.com/54189727 which shows the loud inaudible noise that cell phones make and a meter showing that the earth's resonance was not able to be found in a city with lots of wireless technology going on and so much more. The studies in this link [BIT.LY/2EEPQCM](https://bit.ly/2EEPQCM) are so very many with lots of animal testing which to me is ugly as it is already so obvious that this technology is damaging to all living things. [BIT.LY/2EEPQCM](https://bit.ly/2EEPQCM) contains much evidence of the damaging effects to wildlife. The bees, bats and any animals using radar are very much affected. There is so much more, thousands and thousands, literally, of research documents by so many countries which is not contained in this link [BIT.LY/2EEPQCM](https://bit.ly/2EEPQCM).

When I went to Montpelier on March 31, 2026 I left feeling horrified at the way my biological system was feeling. A friend had to go to Montpelier for a meeting on the same day and her reaction was the same. A woman that was running the cash register at one of my shopping stops was nearly unable to ring my three items up and when I got into my car to leave a woman drove out ahead of me that looking to be in a daze. It was certainly a "What is going on here?" moment. When I got home I realized I felt angry and agitated without even thinking about any specific thing to cause this. There were certainly even more cell phones in Montpelier and, of course, many towers. The State House radiation is over the top when measured.

With all of the information available to us, it is more than difficult to understand why anyone would use this technology or even think about enabling the telecommunications industry to install more towers and antennas.

A note about the telecommunications industry. We had to fight a tower in Calais when VTEL was given a large sum of money based on how many towers they installed. We fought and won and helped Cabot with information where VTEL showed they were completely unaware of what they were doing as they said they would be serving homes in the valley up over a huge hill which is impossible. They just wanted to place towers to get the money. So many towns are spending so much money to fight towers being placed in their town.

More about the telecommunications industry. They have shown a total lack of integrity and have lied by producing false studies, deleted studies showing harm, and threatened anyone trying to reveal the truth.

Once again, with all the information available to us, why would we even begin to consider enabling the telecommunications industry to install any towers or antennas.

Let's be clear here, I value my health and the health of every living thing on this Earth, including this beautiful planet that we are so lucky to inhabit and would never, ever place a communication device above it.

Please take all the time you need to clear your head of your device and read as much of the research showing undeniable harm as you can. You owe it to yourself and every Vermonter to know all the facts. So many people are addicted to this technology and cannot even begin to accept the truth so it is up to you to protect them by requiring the telecommunications industry to follow the Act 250 regulations and more. Don't let the money makers push you to the wrong decision. Please read the documents contained in the [bit.ly](#) file and search for more research that reveals the truth about wireless technology. Check your sources to make sure the information provided is accurate.
