

April 17, 2026

Dear Senator Finance Committee:

I am writing to express REV's support for the amendment to H.710 submitted by the Public Utility Commission (PUC).

This language would create a process for the PUC to revise the existing decommissioning requirements for solar arrays in Vermont. We support the PUC undertaking this process because we believe it will lead to the creation of a new decommissioning system that will ultimately save ratepayers money while ensuring that solar developers pay the entire cost for the proper decommissioning of solar arrays.

Many thanks for considering this amendment.

Sincerely,

A handwritten signature in cursive script that reads "Peter Sterling".

Peter Sterling, Executive Director  
Renewable Energy Vermont
