

My name is Abbey and I am a 1L JD student at VLGS. I am reaching out to thank the Senate Finance Committee for taking up S.205. Protecting our communities against the harms from AI Data Centers is incredibly important to me and my classmates, and it means a lot that you are considering a much-needed moratorium until our legislative and regulatory landscape is adequately fleshed out. I stand strongly against all forms of environmental, financial, and human exploitation in the name of corporate consolidation, and I feel that S.205 (much more than the House bill) reflects these values.

Warm regards,
Abbey
