

Good morning, Sen. Lyons,

I wanted to reach back out on your request that the Agency examine the feasibility of adding the reporting requirement contained in S.99 to H.13. We have done some preliminary investigation on the ask to examine eligibility cliffs throughout the Agency, and AHS has determined that this report would be a significant administration lift for multiple departments. It is our position that the reporting requirement contained in S.99 would present a considerable burden for AHS, and we would question the value of the reporting requirement in relation to the increased staff burden.

Thank you for the opportunity to weigh in on this reporting question.

Best,
Alex
