# Mental Health Impact on Health Care Workers

---

Evidence of a causal relationship between workplace violence and depression symptoms, anxiety, and suicidal ideation

---

[O'Brien CJ, van Zundert AAJ, Barach PR. The growing burden of workplace violence against healthcare workers: trends in prevalence, risk factors, consequences, and prevention - a narrative review. EClinicalMedicine. 2024 May 27;72:102641. doi: 10.1016/j.eclinm.2024.102641. PMID: 38840669; PMCID: PMC11152903.](#)

# Workplace Violence Cost Impacts

In the United States, the annual turnover rate of nurses is estimated to be between 15% to 36% due to workplace violence.

Rozina Somani, Carles Muntaner, Edith Hillan, Alisa J. Velonis, Peter Smith, A Systematic Review: Effectiveness of Interventions to De-escalate Workplace Violence against Nurses in Healthcare Settings, *Safety and Health at Work*, Volume 12, Issue 3, 2021, Pages 289-295, ISSN 2093-7911, <https://doi.org/10.1016/j.shaw.2021.04.004>.

Replacing a nurse costs approximately \$88,000 per nurse.

PMID: 38840669; PMCID: PMC11152903.](#)

# Workplace Violence Prevention Cost Impacts

U.S. hospitals spend about \$847 million each year on workplace violence prevention efforts.

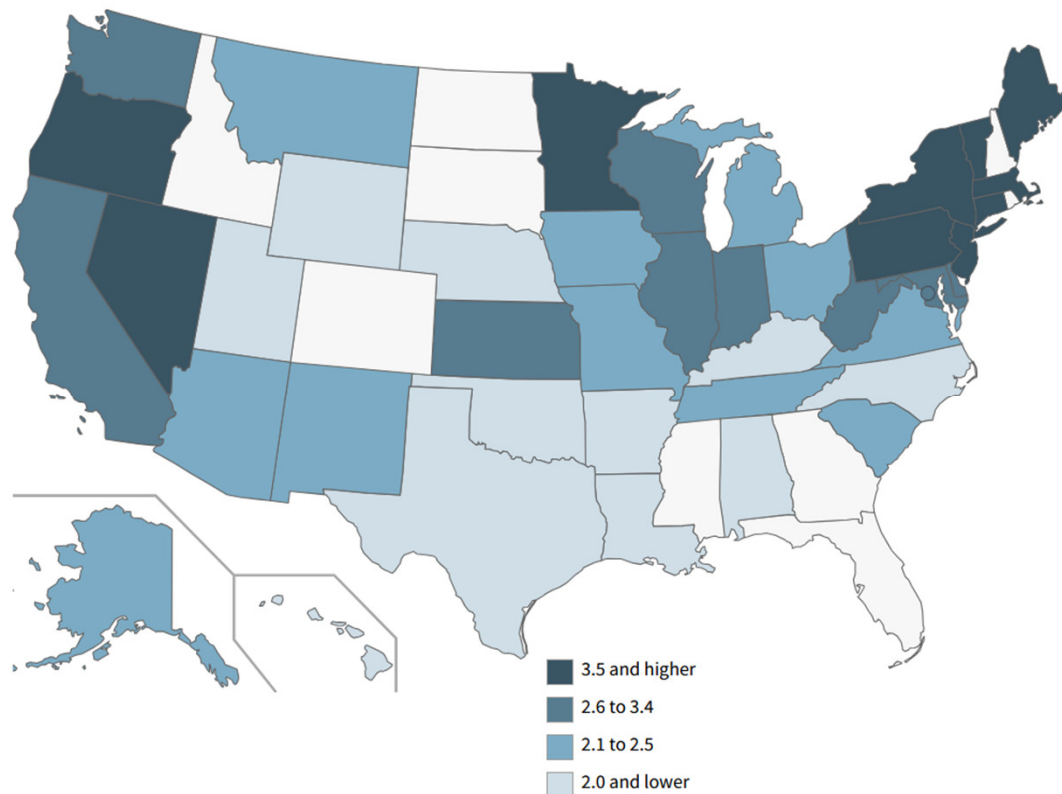

[O'Brien CJ, van Zundert AAJ, Barach PR. The growing burden of workplace violence against healthcare workers: trends in prevalence, risk factors, consequences, and prevention - a narrative review. EClinicalMedicine. 2024 May 27;72:102641. doi: 10.1016/j.eclinm.2024.102641. PMID: 38840669; PMCID: PMC11152903.](#)

## Impact on Patients

- Workplace violence perpetrated on health care workers impacts patients, with self-reported delays or omissions in testing, increases in post-operative complications, higher perceived adverse events and decreased patient safety.
