Rep. Michael Marcotte, Chair
House Committee on Commerce & Economic Development
Vermont State House
115 State Street
Montpelier, VT 05633

Dear Chair Marcotte and Members of the Vermont House Committee
on Commerce & Economic Development,

We Are Vermont. Our Data Is Not for Sale.

We need you to hear us. We are Vermonters: farmers and shop owners, parents and grandparents, veterans and teachers, health care workers and neighbors. We are the people you represent. And right now, while most of us are going about our lives, decisions are being made in your committee room that will determine whether we have any real control over our own information, our own identities, and in some cases, our own safety. We are asking you to pass [Draft 2.3 of S.71](#). And we are asking you not to be fooled.

What is happening to us is not okay. Every search we run, every website we visit, every app we open [is feeding a machine that profiles us, sells us, and uses us](#) without our knowledge and without our consent. [That profile follows us everywhere](#). It shapes what prices we're shown at the grocery store. It influences whether we get called back for a job. It determines what ads chase us around the internet, often exploiting the most vulnerable moments of our lives. We did not agree to this. Most of us had no idea it was happening.

Our neighbors are losing their privacy. Our small businesses are being manipulated by platforms that extract their customers' data and sell it to their competitors. Our most vulnerable community members (people seeking health care, immigrants, survivors of violence, LGBTQ+ youth) are being profiled in ways that can put them in real danger. And now [the federal government is exploring how to buy that same commercial data](#) to use in immigration

enforcement. This is the world we are living in. This is what we are asking you to protect us from.

Our small businesses deserve better than this. Vermont's small businesses did not sign up to be data collection agents for Silicon Valley. But that is what they have become. Every [tracking pixel, every tag manager, every third-party cookie](#) on a Vermont business's website is quietly handing customer data to Google and Meta who then sell it to the business's larger competitors. The Vermont business loses the customer. The platform keeps the money. And if there is a breach, the Vermont business pays the price. We are not asking you to make things harder for Vermont businesses. We are asking you to free them from a system that was never designed to serve them.

Do not be fooled by who is in that room. The [lobbying campaign asking you to weaken this bill](#) is not coming from Vermont's small businesses. It is coming from some of the most [powerful corporations in the world](#), routed through [front groups and chambers of commerce](#) designed to look local. This is a [documented playbook](#). It has been run in [state after state](#). The [groups showing up to testify against strong privacy protections](#) are funded by the same companies that profit from taking our data. The version of this bill they are pushing you toward is modeled on a Connecticut law that [Connecticut's own Attorney General has publicly said needs to be stronger](#) as it has serious gaps, lets too many people fall through exemptions, and needs significant improvement. [We should not be racing to the bottom](#).

Here is what we need you to protect. We need you to protect the principle that businesses should only collect what they genuinely need to serve their customers and nothing more. We need you to protect our most sensitive information: our health, our location, our finances, our identities. We need you to protect the line between the honest advertising Vermont businesses have always done and the surveillance-based targeting that feeds Big Tech's profits at our expense. We already gave up the right to take companies to court ourselves when our privacy is violated. That was a painful concession. We are asking you not to take anything else.

This is about who we are. Vermont is a place where we look out for each other. Where we believe that a person's dignity matters more than a corporation's convenience. Where we have never been afraid to stand up to powerful outside interests when Vermont families are on the line. Privacy is not a partisan issue. It is a human one. Democrats, Republicans, Progressives, and Independents are all being surveilled. We are all being profiled. We are all at risk.

We are counting on you to hold the line. For our families. For our businesses. For our neighbors who are most at risk. And for the simple, fundamental belief that our lives belong to us and not to the highest bidder. Do not let them water this down. We need to be honest with you about what a weak bill actually does. A privacy law that exempts the most powerful data collectors, guts data minimization, and blurs the line between honest advertising and surveillance is not a compromise. It is a weapon. It will be cited for years, by industry lobbyists, in court filings, and in future legislative sessions, as proof that Vermont already addressed data privacy. The extraction will continue behind a veneer of compliance, and the next attempt to

strengthen the law will be met with "but we already passed something." We have seen this happen in other states.

A bad privacy bill is worse than no privacy bill. That is not a threat. It is the documented reality of how weak legislation gets used to prevent stronger legislation from ever passing. Pass Draft 2.3. Pass it strong. We will be here. We are not going anywhere. And neither is this fight.

We, the undersigned Vermonters (individuals, families, and businesses) urge the House Commerce and Economic Development Committee to pass [Draft 2.3 of S.71](#), the Vermont Data Privacy and Online Surveillance Act, without weakening amendments.
