PARTNERS

PUBLIC ACCESS

- The Town of Dorset is pleased to offer our support for the Dorset Ridgeline Project.
- Conservation and Recreation are core values for our community.
- Trust for Public Land working tirelessly to coordinate a 3 parcel 281-acre conservation project that will result in the expansion of Emerald Lake State Park and a new WMA owned by VT F&W.
- Newly conserved land is adjacent to GMNF, private conserved lands, and our Town Forest. Creates the opportunity for trail connectivity.
- Dorset Select Board voted unanimously to support the project.
- VHCB has awarded \$322,000 for these State acquisitions.
- Dorset has a history of over 100 years of public use on these ridgeline trails.

Dorset Ridgeline Project

- Dorset ridgeline project will protect a highest priority landscape in the Taconic mountains, an underrepresented biophysical region with only 19% currently conserved.
- In 2023, Vermont's outdoor recreation economy generated \$2.1 billion in value added, 4.8% of the State's GDP, and supported over 16,000 jobs.
- Protects public access to a system of trails beloved by the public for almost 100 years.
- Creates stronger Local, State, Federal and Non-profit partnerships.
- Positions the Community and partners to enhance outdoor recreational opportunities – improving our community health and local economy.
- This project helps lay the groundwork for the VeloMont Trail in our corner of the State. This legacy project represents a nexus between conservation, recreation and the economy.
- Mountain biking tourists can generate as much as \$416 per visit, through lodging, food and retail activities.
- Spending per visit varies by trail location and type, ranging from just over \$100 to over \$1,000 per visit.
- Studies also show that Trails enhance nearby property values, attract new residents, and promote improved physical and mental health

Dorset Ridgeline Project

- Mt. Aeolus is one of only seven locations in the state designated as “Critical Habitat” under Vermont’s Endangered and Threatened Species Rule.
- Protects vital wildlife corridor between the Taconic and Green Mountain ranges.
- All three parcels are less than 2.2 miles from Aeolus Bat Caves – home to 4 different species of State/Federally endangered bats. Estimated bat population of 70,000 to 90,000.
- Aeolus Cave is the largest bat hibernacula in the Northeastern United States.
- Protects lands adjacent to historic/culturally significant assets – First Marble Quarry in the United States nearby.

Dorset Ridgeline Project

- None of this is possible without the vital resources provided by VHCB and the State of Vermont.
- Total Project Costs: \$701,365
- VHCB Share: \$322,000
- Other Funding: \$375,365
- Fully funding VHCB for both conservation and housing creates a wealth of opportunities for our State.

Conserving North Pawlet Hills with VHCB, Pawlet, VT

February, 2026

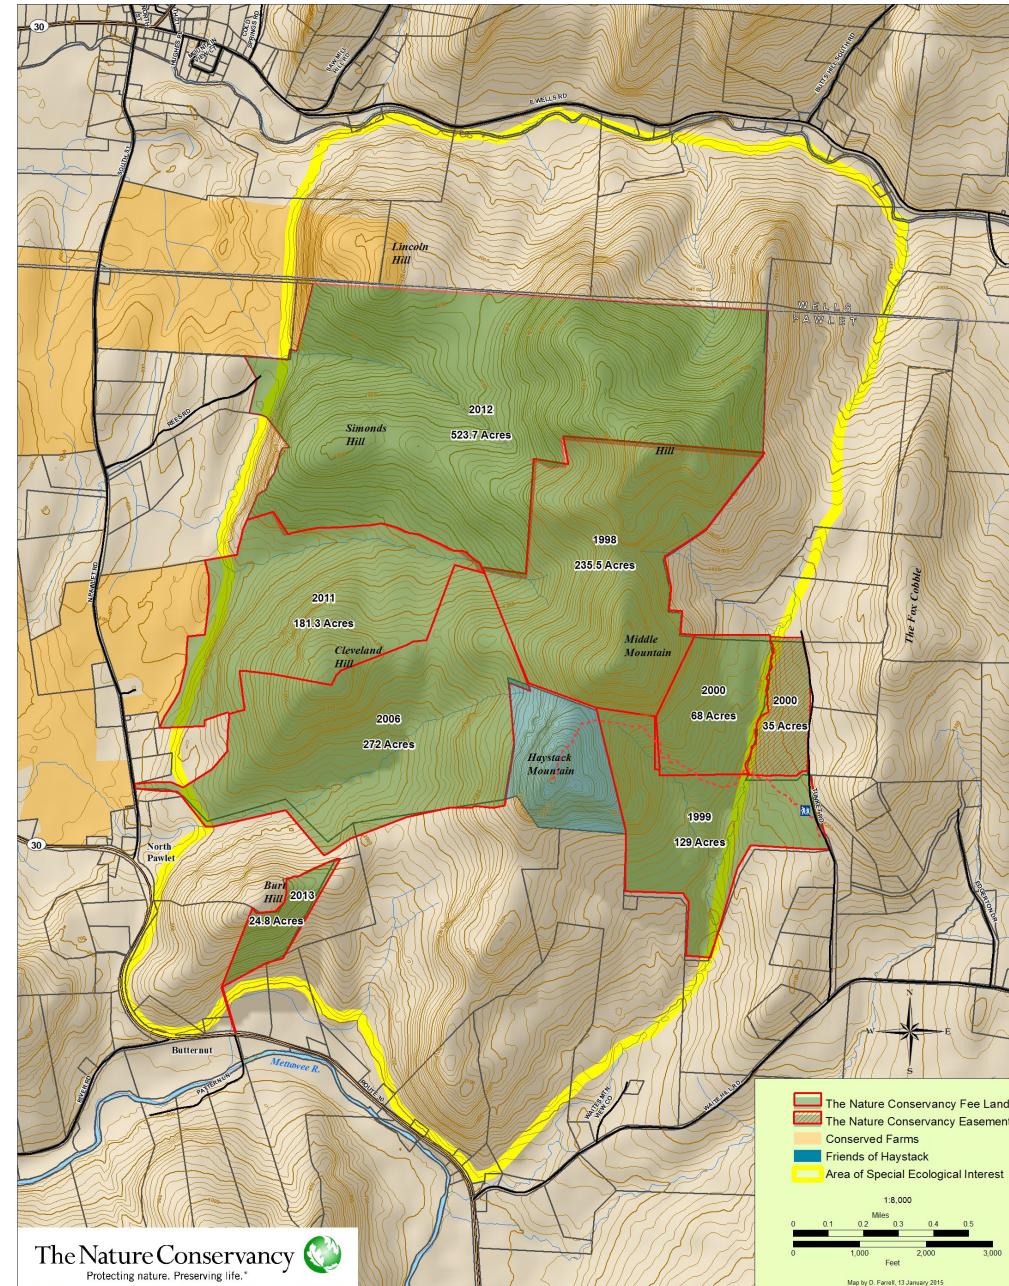

Photos: Jon Binhammer

Since 1998, The Nature Conservancy, together with funding from the Vermont Housing and Conservation Board, has conserved 1,666 acres in 8 projects at North Pawlet Hills

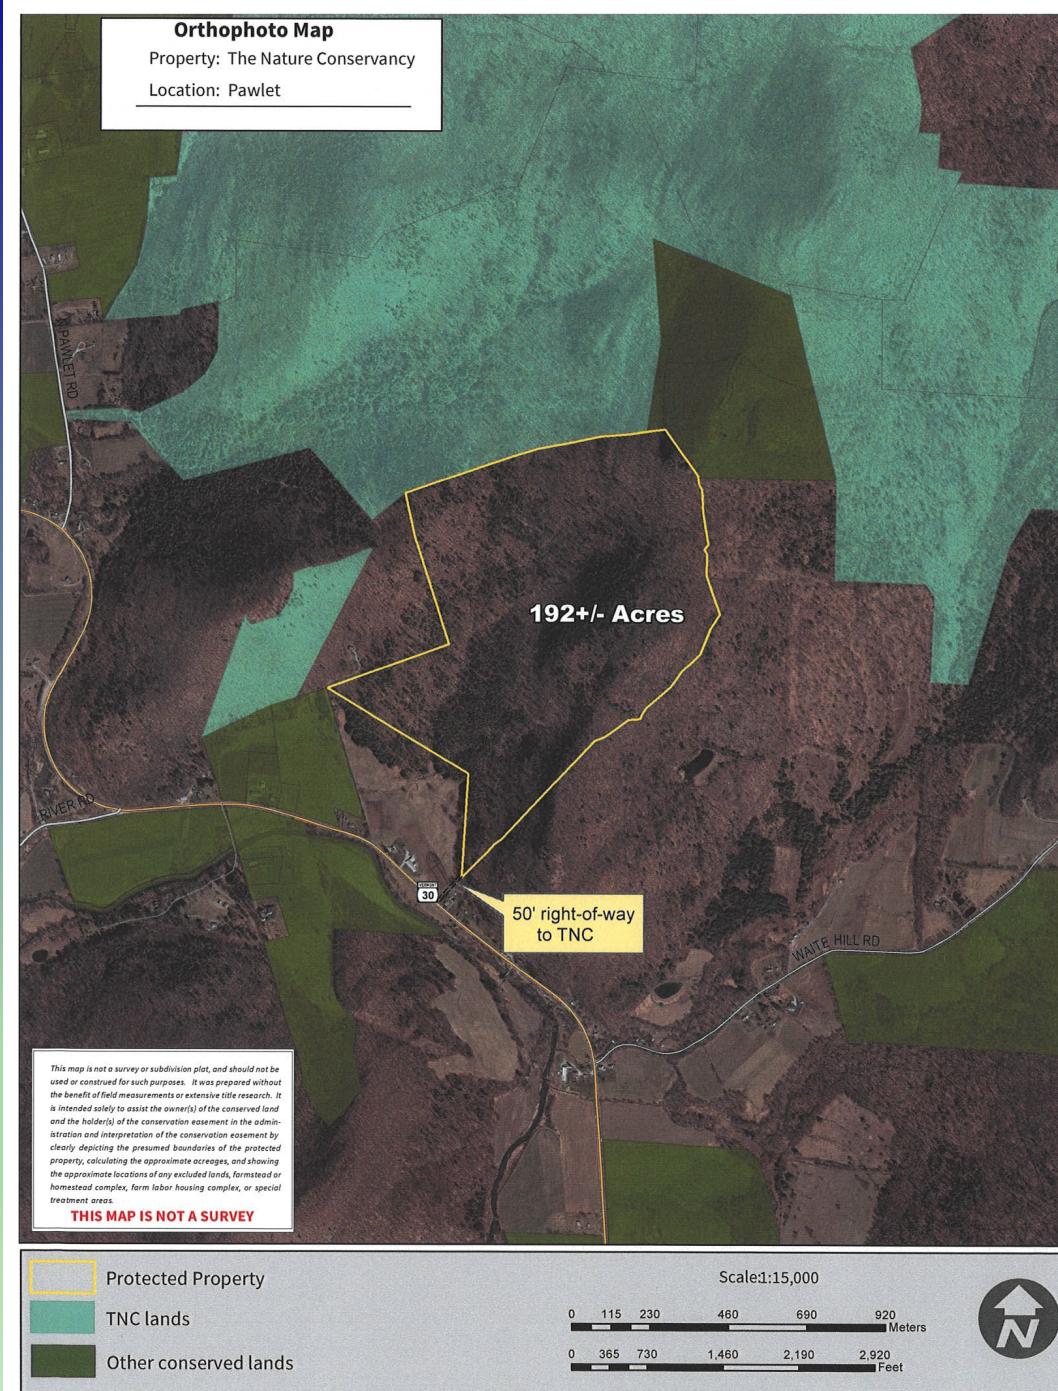

North Pawlet Hills Natural Area

Dry oak-hickory hophornbeam forest

Total Project Cost \$373,000

VHCB grant.... \$206,000

Other funds.... \$167,000

Quarry Hill, Pownal

Habitat for Humanity home

TNC and VHCB partnered to conserve critical wildlife habitat at Quarry Hill in Pownal while also donating a house lot to Habitat for Humanity; the home is shown here.

We are currently working on another VHCB “dual-goal” project at Quarry Hill that will conserve 45 acres and convey a 2 acre lot to Habitat for Humanity for the development of another affordable home.
