Show Me the Money!

Vermont Agency of Transportation Grants – A guide for Municipalities

Compiled by the VTrans – Municipal Assistance Section

Top: Better Roads project Cabot, VT.
Middle- Lamoille Valley Rail Trail bridge in Wolcott, VT.
Bottom- 2023 Flood damage on Craftsbury Road in Greensboro, VT.

Purpose and Introduction

The purpose of this guide is to familiarize municipalities with grant funding available at the Vermont Agency of Transportation (VTrans) to aid in addressing local transportation needs. With tight and competitive budgets, this guidebook will educate municipalities on available transportation money.

This guide contains short one- to two-page summaries of current grant programs at VTrans that are applicable to municipalities, and more specifically, local transportation networks. Each section contains information about each grant program, including contact information, funding, project eligibility/applicability, and any other pertinent supplemental information.

While every effort has been made to make this a cohesive and accurate listing of grant programs, deadlines, and funding splits; please contact each Program Manager to ensure that grant deadlines, categories, eligibility, and funding splits have not changed prior to submitting your application(s)!

Better Roads Program

A grant program for municipalities that provides funds for planning and erosion control projects that improve water quality and reduce maintenance costs.

Ross Gouin
(802) 595-2381
ross.gouin@vermont.gov

Daniel Judkins
(802) 595-61874
daniel.judkins@vermont.gov

Category A Grants

Category A grants are for planning and provide funding to conduct a road erosion inventory, prioritize identified projects and develop a budget plan to implement the projects over a period of time.

Category B Grants

Category B grants are for construction projects that correct an erosion problem and/or stormwater mitigation retrofit to the road drainage system that will result in improved water quality. Examples of eligible projects in this category are the installation of grass or stone lined ditches, rain gardens that treat road runoff, or drop inlet rehab/replacement.

Maximum grant award: \$20,000

Category C Grants

Category C grants are for construction projects that correct a streambank, lake

Grant Details:

- Program uses State funds and all grants require a 20% local match which can be covered by using municipal labor, equipment, and materials. *NOTE: Funding on Category A is federal at 80%, with 20% local match.*
- Applications are due annually, usually in the Fall. Grant information is posted to the Better Roads website at: <http://vtrans.vermont.gov/highway/better-roads>
- Awards are made in June-July and work must be completed by September 30th of the following year.

shore or other slope related erosion problem on town roads.

Maximum grant award: \$40,000

Category D Grants

Category D grants are for structure/culvert upgrade projects. These grants can be used to replace structures larger than 36" and must meet the sizing requirements of a hydraulic study, or consultation with an ANR River Management Engineer.

Maximum grant award: \$60,000

Bicycle & Pedestrian Program

A grant program to provide safe and convenient facilities for those Vermonters who desire alternative transportation opportunities.

Ande Deforge
(802) 595-6657
ande.deforge@vermont.gov

Peter Pochop
(802) 477-3123
Peter.pochop@vermont.gov

Scoping (feasibility) studies

Many projects that are funded for design and construction are the result of a formal Scoping or Feasibility Study. Studies are for projects that have not been evaluated yet to look at different alternatives, assess right of way and environmental impacts, and develop realistic cost estimate. Scoping Studies help define projects, generate public support, and provide more confidence that a project will be successfully completed. A Scoping Study may be used to apply for subsequent rounds of design and construction funding that are available.

Federally funded, 20% local cash match is required.

Design/Construction projects

Project applied for under this category will be taking all of the necessary steps to move a concept through the design, permitting and right of way process to advance to construction... The Bike/Ped Program does not fund design only projects. All project (including scoping studies) must be completed or there is a pay-back provision. Eligible costs for design-construction projects include project management/administration, engineering/permitting, right of way acquisition, construction, and construction inspection.

Federally funded, 20% local cash match is required.

Small Scale Projects

The intent of this category of eligible projects is to address simple, but critical improvements that will increase access and/or safety of people choosing to bike or walk. These projects will be funded with all State dollars, lessening the requirements to be met before construction can take place. This funding may not be used to provide match to a federally funded project or to add on to a federally funded project. These projects must be small stand-alone improvements. Awards will be for construction only. Applicants will be responsible for the cost of any design and administration that is needed. The general eligibility criteria stated above still applies and it is expected that these projects will likely include crosswalk enhancements, bicycle lane markings/signs, edge line markings, addressing ADA compliance issues, and critical small gaps in sidewalk networks.

State funded with a required 50% local cash match.

Bicycle & Pedestrian Program (continued)

Grant Details:

- Typical Design/Construction grant award of around \$750,000.
- Typical Scoping Report grant award of around \$50,000.
- Applications are due annually around June.
- Projects take on average 3-5 years to complete from date of application to end of construction.

Other Program Requirements:

- Eligible applicants include the following:
 - Local government
 - Regional transportation authority
 - Transit agency
 - Natural resource or public lands agency
 - School district or school
 - Tribal government
 - Regional planning commission
- Reimbursement program, invoices must be paid by the municipality before VTrans reimburses for eligible grant expenses.
- Program Requirements:
 - Successful applicants are expected to develop projects expeditiously.
 - Applicants are expected to follow FHWA and Agency requirements.
 - Applicants are required to have a Municipal Project Manager (MPM). MPM's are responsible for the day-to-day management and administrative duties involved with advancing the project to completion. Applicants can either utilize a qualified staff member to carry out project management, or contract with a private consultant or their Regional Planning Commission. The cost of local project management is an eligible project cost and should be included in the project budget.
 - For projects within the State Highway ROW, municipalities are required to coordinate with the local VTrans District Transportation Administrator (and District Project Manager) to ensure that State operations are considered in the project design.
 - Projects must be planned and designed in accordance with the standards and guidance provided by: AASHTO, MUTCD, NACTO, ADA, PROWAG, and all other applicable State and Federal statutes, standards, specifications, and guidelines.
 - All personal services (i.e., consultants) and construction contractors must be procured according to State and Federal guidelines. Sole sourcing of consultants or contractors is not allowed.
- More details about the program are found on the website at:
 - <https://vtrans.vermont.gov/highway/local-projects/bike-ped>

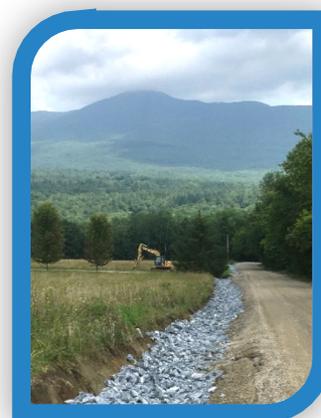

Grants in Aid Program

A grant program that provides funding for municipalities to implement Best Management Practices (BMPs) in compliance with the Vermont Department of Environmental Conservation (DEC) Municipal Roads General Permit (MRGP).¹

Ross Gouin
(802) 595-2381
ross.gouin@vermont.gov

Ashley Andrews
(802) 498-5548
ashley.andrews@vermont.gov

Elise Grout
(802) 793-0529
elise.grout@vermont.gov

VTrans will offer funding to participating municipalities to implement BMPs on hydrologically connected road segments that currently do not meet standards.² A municipality's funding award depends upon:

- Awards are contingent upon Municipalities being compliant with MRGP requirements at the time of award.
- The number of hydrologically connected roads, sorted into five-mile increments.
- The number of participating municipalities.

Additional funds may become available should some municipalities decide not to participate. Base offers are posted on the VTrans Grants in Aid website at:

<https://vtrans.vermont.gov/highway/Municipal-Grant-in-aid-Program>

Grants-in-Aid awards will be made available through VTrans. Municipalities will submit reimbursement requests for work completed directly to VTrans and VTrans will reimburse up to 80% of the municipality's documented construction expenses, including in-kind support, for BMPs on hydrologically connected roads.

¹ MRGP available at:

<http://dec.vermont.gov/watershed/stormwater/permit-information-applications-fees/municipal-roads-program>.

² Hydrologically connected roads are those that drain directly into surface waters (streams, rivers, ponds, lakes, and wetlands) as defined by the MRGP.

Grants in Aid Program (continued)

Eligible BMPS according to the MRGP standards:

Some examples include:

- grass and stone-lined drainage ditches and stone check-dams;
- turnouts, cross culverts, and other disconnection and infiltration practices;
- lowering of high road shoulders;
- installation or replacement of drainage culverts and driveway culverts on non-perennial streams within right of way and installation of culvert headwalls and outlet stabilization;
- stabilizing conveyance zones;
- addressing gully erosion on Class 4 roads; and
- stabilizing catch basin outlets.

Grant Details:

- Program uses State funds and all grants require a 20% local match which can be covered by using municipal labor, equipment, and materials.
- Letter of Intent is required to participate. Formula funding is shared among Municipalities that submit a letter of intent to VTrans, usually due by June 25th. Grant information and Letter of Intent is posted to the VTrans Grants in Aid website at: <https://vtrans.vermont.gov/highway/Municipal-Grant-in-aid-Program>
- Awards are made in July and work must be completed by September 30th of the following year.
- Municipalities are required to complete a preconstruction site visit with VTrans or a designated agent, which includes an assessment of the road segment and data entry to the MRGP portal.
- Municipalities are required to submit a single invoice to VTrans at project completion along with a certification that the road segments repaired using these funds are fully compliant with the MRGP at conclusion of project.
- Invoicing format can also be found at our website: <https://vtrans.vermont.gov/highway/Municipal-Grant-in-aid-Program>

Transportation Alternatives Program

A grant program that encompasses a variety of smaller scale transportation projects such as pedestrian and bicycle facilities, Safe Routes to School projects, community improvements such as historic preservation and vegetation management, and environmental mitigation related to stormwater and habitat connectivity.

Scott Robertson

scott.robertson@vermont.gov

The following are activities that are eligible for the Transportation Alternatives Program:

A.

Construction, planning, and design of on-road and off-road trail facilities for pedestrians, bicyclists, and other non-motorized forms of transportation, including sidewalks, bicycle infrastructure, pedestrian and bicycle signals, traffic calming techniques, lighting and other safety-related infrastructure, and transportation projects to achieve compliance with the Americans with Disabilities Act of 1990.

B.

Construction, planning, and design of infrastructure-related projects and systems that will provide safe routes for non-drivers, including children, older adults, and individuals with disabilities to access daily needs.

C.

Conversion and use of abandoned railroad corridors for trails for pedestrians, bicyclists, or other non-motorized transportation users.

D.

Construction of turnouts, overlooks, and viewing areas.

E.

Community improvement activities, including:

- Historic preservation and rehabilitation of historic transportation facilities.
- Vegetation management practices in transportation rights-of-way to improve roadway safety, prevent against invasive species, and provide erosion control.
- Archaeological activities relating to impacts from implementation of a transportation project eligible under this title.

Transportation Alternatives Program (continued)

F.

Any environmental mitigation activity, including pollution prevention and pollution abatement activities and mitigation to:

- Address stormwater management, control, and water pollution prevention or abatement related to highway construction or due to highway runoff, including activities described in section 133(b)(11), 328(a), and 329.
- Reduce vehicle-caused wildlife mortality or to restore and maintain connectivity among terrestrial or aquatic habitats.
- Construction of salt sheds is eligible under the environmental mitigation category. Eligibility for salt sheds will be considered on a case-by-case basis based on proximity of the existing storage location to a major water body (generally within 50 ft). We recommend reviewing eligibility with VTrans prior to application submittal.

Grant Details:

- Maximum grant award of \$300,000 with a 20% local match.
- Applications are due annually around September.
- Projects take on average 3-5 years to complete from date of application to end of construction.

Other Program Requirements:

- Eligible applicants include the following:
 - Local government
 - Regional transportation authority
 - Transit agency
 - Natural resource or public lands agency
 - School district or school
 - Tribal government
 - Regional planning commission
- Reimbursement program, invoices must be paid by the municipality before VTrans reimburses for eligible grant expenses.

Transportation Alternatives Program (continued)

- Program Requirements:
 - Successful applicants are expected to develop projects expeditiously.
 - Applicants are expected to follow FHWA and Agency requirements.
 - Applicants are required to have a Municipal Project Manager (MPM). MPM's are responsible for the day-to-day management and administrative duties involved with advancing the project to completion. Applicants can either utilize a qualified staff member to carry out project management, or contract with a private consultant or their Regional Planning Commission. The cost of local project management is an eligible project cost and should be included in the project budget.
 - For projects within the State Highway ROW, municipalities are required to coordinate with the local VTrans District Transportation Administrator (and District Project Manager) to ensure that State operations are considered in the project design.
 - Projects must be planned and designed in accordance with the standards and guidance provided by: AASHTO, MUTCD, NACTO, ADA, the VTrans Pedestrian & Bicycle Facilities Planning and Design Manual, and all other applicable State and Federal statutes, standards, specifications, and guidelines.
 - All personal services (i.e., consultants) and construction contractors must be procured properly according to State and Federal guidelines. Sole sourcing of consultants or contractors is not allowed.
 - More details can be found on the website at:
<https://vtrans.vermont.gov/highway/local-projects/transport-alt>

Municipal Highway & Stormwater Mitigation Program

Any environmental mitigation activity, including pollution prevention and pollution abatement activities and mitigation to address stormwater management, control, and water pollution prevention or abatement related to highway construction or due to highway runoff.

Ross Gouin

(802) 595-2381

ross.gouin@vermont.gov

The following are activities that are eligible for the Municipal Highway & Stormwater Mitigation Program:

- Planning Studies
- Stormwater Inventories
- Flow Restoration Plans
- Phosphorus Control Planning
- Salt/Sand Sheds
- Bank Stabilization
- Culvert Replacement/Re-sizing
- Stream Bank Stabilization
- Detention Ponds
- Check Dams
- Swirl Separators
- Permeable Pavers
- Infiltration Basins
- Gravel Wetlands
- Subsurface Detention Systems
- Bio Filters
- Bio Retention Systems

Grant Details:

- Federal grant at 80% of project cost with a 20% local match.
- As this is federally funded, efficiency is gained on projects with costs of \$200,000 and up generally.
- Applications are due annually in the fall.
- Projects take on average 3-5 years to complete from date of application to end of construction.

Municipal Highway & Stormwater Mitigation Program (continued)

Other Program Requirements:

- Eligible applicants include the following:
 - Local government
 - Regional transportation authority
 - Transit agency
 - Natural resource or public lands agency
 - School district or school
 - Tribal government
 - Regional planning commission
- Reimbursement program, invoices must be paid by the municipality before VTrans reimburses for eligible grant expenses.
- Program Requirements:
 - Successful applicants are expected to develop projects expeditiously.
 - Applicants are expected to follow FHWA and Agency requirements.
 - Applicants are required to have a Municipal Project Manager (MPM). MPM's are responsible for the day-to-day management and administrative duties involved with advancing the project to completion. Applicants can either utilize a qualified staff member to carry out project management, or contract with a private consultant or their Regional Planning Commission. Project management is an eligible project cost and should be included in the project budget.
 - For projects within the State Highway ROW, municipalities are required to coordinate with the local VTrans District Transportation Administrator (and District Project Manager) to ensure that State operations are considered in the project design.
 - Projects must be planned and designed in accordance with the standards and guidance provided by: AASHTO, MUTCD, NACTO, ADA, the VTrans Pedestrian & Bicycle Facilities Planning and Design Manual, and all other applicable State and Federal statutes, standards, specifications, and guidelines.
 - All personal services (i.e., consultants) and construction contractors must be procured according to State and Federal guidelines. Sole sourcing of consultants or contractors is not allowed.

<https://vtrans.vermont.gov/highway/Municipal-Highway-and-Stormwater-Mitigation-Program>

Municipal Park & Ride Program

A grant program for municipalities that provides safe and convenient parking facilities to encourage the consolidation of travelers and the reduction of single occupancy vehicles on the roads.

Tina Bohl

tina.bohl@vermont.gov

Derek Kenison

derek.kenison@vermont.gov

Grants are awarded for preliminary engineering and construction activities of park-and-ride facilities in municipalities.

Projects may include any of the following features:

- Shared-use or Stand-alone
- Existing or New facilities
- Gravel or Paved surfaces
- Shelters
- Lighting
- Bike Racks
- Guardrail
- Signs and Pavement Markings
- Handicapped Accessibility
- Transit Connections
- Other Amenities

Grant Details:

- State funds. Please see program announcement to determine local match percentage.
- No maximum grant amount, awards vary based on annual appropriation.
- Applications are due annually around August.

Other Program Requirements:

- Land used must currently be owned by the Municipality. Land can be owned by State of Vermont with a State Highway Access Permit or privately with a minimum 20-year lease. Note that grant funds cannot be used for Right-of-Way or lease expenses.
- Lot location must be on or near a State Highway.
- Lot must be available for commuters' use year-round.
- Lot size must provide parking spaces for greater than 10 vehicles.
- Lot must be maintained by municipality.
- Municipality will collaborate with Public Transit providers when an existing or planned transit route is present.

Town Highway Bridge Program

This is a grant program for municipalities that provides funds for major rehabilitation projects to extend the life of an existing structure, or projects to reconstruct/replace/eliminate bridges on Class 1, 2, or 3 town highways. Bridges must span 6 feet or greater.

Contact your local Regional Planning Commission

Bridges may become part of the program in the following ways:

VTrans inspects all bridges with spans greater than 20 feet. If critical defects are detected a Bridge Inspection Finding (BIF) letter is sent to the municipality and District advising of the deficiency.

Municipalities are responsible for inspecting all bridges with spans of 20 feet or less.

A list of tentative new projects is drafted by VTrans, based on statewide bridge data, priority, and/or Regional Planning Commission recommendations. “Long structure” selections are based on VTrans’ priority system that includes the structural condition, load restrictions, width restrictions, approach alignment, average daily traffic, waterway adequacy, detour length, and RPC priority. These factors are combined into a ranking for each bridge and establish its priority in relation to all of the other “long structures” on town highways. “Short structure” selections are based on similar criteria but are not currently ranked by VTrans. VTrans’ Structures Program Manager notifies municipalities that their bridge is eligible as a candidate for design funding. Municipalities have the option of participating or may decline to do so. Municipalities wishing to proceed with a project must respond, in writing, to VTrans.

Grant Details:

- Funds may be a mix of Federal and State funding. Match varies based on the scope of the project. At a minimum there is a 10% match. Total project cost is not capped.
- There is no application deadline for projects. Please inquire with the Structures Manager if you would like to discuss the possibility of your bridge becoming a project.
- Most projects take around 5 years; some may be longer.

Other Program Requirements:

- Municipalities must complete a finance and maintenance agreement before any work is done on the project.

Town Highway Structures Grant Program

A grant program for municipalities that provides funds for short bridges, culverts, retaining walls, and other town highway related structures on Class 1, 2, or 3 town highways.

Contact your local VTrans District Office

Projects may address the maintenance (including actions to extend the life expectancy) and construction of bridges, culverts, and other structures including causeways and retaining walls. In general, the improvement must preserve the integrity of the eligible structure of Class 1, 2, or 3 town highways.

Grant Details:

- State funds, maximum grant award of \$200,000 with a 20% match.
- Match may be reduced to 10% if a municipality meets the following requirements:
 - Adopted town highway codes and standards that meet or exceed the minimum requirements of the VTrans June 2019 template, and
 - Conducted a highway infrastructure study (not less than three years old) which identifies all town culverts, bridges, and identified road problems. The inventory would include location, size, deficiency/condition, and estimated cost of repair—where the condition is less than acceptable.
- Applications are due annually, usually in April.
- Project performance periods are 30 months.
 - Time extensions can be requested with adequate justification.

Other Program Requirements:

- Administration work associated with these projects are not eligible costs, however, engineering or design costs incurred by a municipality are eligible.
- Culvert replacement equal to or greater than 36 inches in diameter shall be part of this program, culverts less than 36 inches in diameter shall be part of the Town Highway Class 2 Roadway Program.
- Municipalities are responsible for all aspects of preparing plans, securing permits, and inspection of the work and all eligible project costs.
- Municipalities are responsible for all signage and traffic control, which must be in conformance with MUTCD guidelines.
- Grant is a reimbursement program and municipalities are responsible for funding of the work until the work is completed. In certain circumstances a partial claim may be accepted.
- Municipalities should seek bids from at least 3 vendors when projects are funded by State Grants unless performing work themselves.

Town Highway Class 2 Program

A grant program for municipalities that provides funds for the preservation of any Class 2 highways for resurfacing or reconstruction.

Contact your local VTrans District Office

Projects shall include detailed work for the preservation of any Class 2 town highway for resurfacing (to include both paving and gravel surfacing or re-surfacing) and re-construction based on identified needs. Eligible activities include preliminary engineering, construction, and construction inspection/management.

Grant Details:

- State funds, maximum grant award of \$200,000 with a 30% match.
- Match may be reduced to 20% if a municipality meets the following requirements:
 - Adopted town highway codes and standards that meet or exceed the minimum requirements of the VTrans June 2019 template.
 - Conducted a highway infrastructure study (not less than three years old) which identifies all town culverts, bridges, and identified road problems. The inventory would include location, size, deficiency/condition, and estimated cost of repair-where the condition is less than acceptable.
- Applications are due annually, usually in April.
- Project performance periods are 30 months.
 - Time Extensions can be requested with adequate justifications.

Other Program Requirements:

- Administration work associated with these projects are not eligible costs, however, engineering or design costs incurred by a municipality are eligible.
- Culvert replacement less than 36 inches in diameter shall be part of this program, culverts equal to or greater than 36 inches in diameter shall be part of the Town Highway Structures Program.
- Municipalities are responsible for all aspects of preparing plans, securing permits, and inspection of the work and all eligible project costs.
- Municipalities are responsible for all signage and traffic control, which must in in conformance with MUTCD guidelines.
- Bicycle and pedestrian use should be considered when choosing shoulder widths and materials. In general, any existing shoulder should not be reduced in width.
- Grant is a reimbursement program and municipalities are responsible for funding of the work until the work is completed. In certain circumstances a partial claim may be accepted.
- Municipalities should seek bids from at least 3 vendors when projects are funded by State Grants unless performing work themselves.

Town Highway Emergency Grants

A grant program for municipalities that provides funds for emergency storm damage repairs.

Contact your local VTrans District Office

State funding assistance is available for repair, reconstruction or replacement of highways on Class 1, 2, 3 town highways and for the repair/replacement of drainage structures including bridges on Class 1, 2, 3, and 4 town highways, which are damaged by natural or man-made events.

Grant Details:

- State funded.
- Funds provided are up to 90% of the eligible repair or replacement costs, OR, the eligible repair or replacement cost, minus an amount equal to 10% of the overall total highway budget minus the municipality's winter maintenance budget, whichever is greater.
- Projects must be completed 2 years from the date of the grant award.

Other Program Requirements:

- Administration associated with the projects is not an eligible cost
- Funding is allocated if there is money left in the program, and if the following criteria are met:
 - That the disaster is of such magnitude that state aid is both reasonable and necessary to preserve the public good.
 - That the disaster does not qualify for major disaster assistance from the Federal Emergency Management Agency or the Federal Highway Administration.
 - If the project cost is 10% or more of the non-winter highway budget it is determined that the disaster is of a magnitude to warrant assistance from the fund.
- For municipalities that have adopted road and bridge standards, eligibility for reimbursement for repair or replacement of infrastructure shall be to those standards. For municipalities that have not adopted these standards, eligibility for reimbursement for repair or replacement of infrastructure shall be limited to the specifications of the infrastructure that pre-existed the emergency event.
- Municipalities must document all costs associated with the project and request payment within 45 days of completion of the project. Any payment of funds must also be made within the period of the grant (2 years) unless the municipality requests and is granted an extension to the original grant period.

Small Scale Local HSIP Grant Program

A grant program that provides funds to municipalities for implementing countermeasures to improve safety and reduce crashes on local roadways.

Jesse Devlin

jesse.devlin@vermont.gov

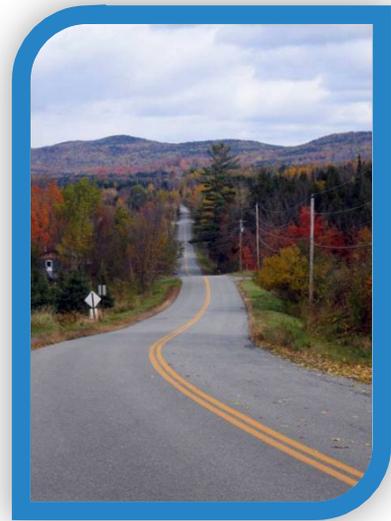

HSIP Technical Support

AOT.HSIPEngineer@vermont.gov

Grants are awarded for the construction of selected safety-proven countermeasures.

Projects can include any of the following activities:

- Curve Signage
- Intersection Signage
- Edge Line Markings on Paved Roads
- Intersection Pavement Markings
- Clear Zone Improvements (removing objects, trees, poles)
- Breakaway Devices

Grant Details:

- Applications are solicited periodically.
- Maximum grant amount is \$50,000.
- See the Small Scale Local HSIP Grant program guide to determine local match percentage, if any.
- Multiple project locations may be submitted together and will likely be awarded as one grant.

Other Program Requirements:

- All projects must be within the public right-of-way.
- Municipalities are responsible for the cost of any design and administration that is needed.
- It is expected that construction will be complete in the year following execution of the grant agreement.
- Municipalities will maintain the constructed improvements for their expected service lives.

FHWA Emergency Relief Program

FHWA's Emergency Relief Program provides federal assistance to government organizations following a Presidential disaster declaration.

Municipal Assistance provides grants to local governments that have sustained damages on their Federal Aid System (FAS Routes) after a declared disaster. This is so communities can quickly respond to and recover from major disasters or emergencies. When damages are identified on FAS routes under local control, contact the State to properly document the damages for eligibility.

[ArcGIS - Vermont Functional Class and Federal Aid Highways](#)

Chad Greenwood - State Maintenance Engineer

chad.greenwood@vermont.gov

Ross Gouin – Municipal Assistance

Ross.Gouin@vermont.gov

Grant Details:

Congress authorized in Title 23, United States Code, Section 125, a special program from the Highway Trust Fund for the repair or reconstruction of Federal-aid highways and roads on Federal lands which have suffered serious damage as a result of (1) natural disasters or (2) catastrophic failures from an external cause. This program, commonly referred to as the emergency relief or ER program, supplements the commitment of resources by States, their political subdivisions, or other Federal agencies to help pay for unusually heavy expenses resulting from extraordinary conditions.

Applicability of ER to a catastrophic failure due to an external cause is based on the criteria that the failure was not the result of an inherent flaw in the facility but was sudden, caused a disastrous impact on transportation services, and resulted in unusually high expenses to the highway agency.

Federal Share:

Approved ER funds are available at the pro-rata share that would normally apply to the Federal-aid facility damaged. For Interstate highways, the Federal share is 90 percent. For all other highways, the Federal share is approximately 80 percent. The Federal share for permanent ER repairs may amount to 90 percent if the combined eligible ER expenses incurred by the State in a Federal fiscal year exceeds the annual apportionment of the State under 23 U.S.C. section 104 for the fiscal year in which the disasters or failures occurred.

Emergency repair work to restore essential travel, minimize the extent of damage, or protect the remaining facilities, accomplished in the first 270 days after the disaster occurs, may be reimbursed at 100 percent Federal share.

Better Connections Grant Program

The Better Connections Program (BC) is a partnership between the Vermont Agency of Transportation (VTTrans), the Agency of Commerce and Community Development (ACCD), and the Agency of Natural Resources (ANR). Better Connections provides planning grants to municipalities to develop roadway master plans that increase multi-modal transportation options, evaluate future land use, and improve water quality. The program provides technical assistance and funds to local communities to help them develop a community vision and create a strategic plan to achieve their goals and plan for growth. The program aims to help with transportation planning using Smart Growth Principles through technical assistance to towns to:

- help communities identify and prioritize their goals and projects.
- develop an action-oriented plan to achieve the goals and move projects directly to implementation; and
- link the communities to a growing network of public and philanthropic partners to help them implement their priority projects.

Faith Dall – Vtrans Program Manager

faith.dall@vermont.gov

Natalie Elvidge – ACCD Program Manager

Natalie.Elvidge@vermont.gov

The Program is open to new applications annually each fall. Municipalities compete for approximately \$200,000 in projects funds. A 10% local cash match is required for the non-ANR funding portion. The Program funds master plans focusing on:

- Improved Multimodal Connectivity (Aviation, Rail, Transit, Rail Trails, Bike & Pedestrian)
- Active Transportation and Complete Streets
- Access Management
- Traffic Circulation & Parking,
- Traffic Calming
- Wayfinding
- Rehabilitation of Buildings
- Redevelopment of Sites and Housing
- Land Use Planning
- Stormwater management
- Protection of Community Greenspace

In addition to the development of the master plan, the program can fund corresponding economic and marketing plans to ensure the market viability of the proposed improvements and inform the municipality's capital planning. Applicants have the opportunity to apply for additional funds to support projects that improve water quality and public health. The program is primarily funded by the Agency of Transportation, with additional staff support and funding provided by the Agency of Commerce and Community Development, Agency of Natural Resources, and Department of Health. More information can be found at:

<https://vtrans.vermont.gov/planning/projects-programs/better-connections>

Mobility and Transportation Innovations (MTI) Grant Program

A grant program for municipalities to create or support efficient modes of transportation best suited for each community.

Jeremy Whiting
 (802) 793-2878
Jeremy.Whiting@vermont.gov

Grant Details:

- The VTTrans Public Transit Section is offering grants to municipalities to support innovative strategies and projects that improve both mobility and access to services for transit-dependent Vermonters, reduce the use of single occupancy vehicles, and reduce greenhouse gas emissions.
- Local Selectboards and Energy Committees are a logical partner in this effort as you can bring local credibility, energy, and innovation to the ongoing effort to expand the reach of transportation demand management.
- VTTrans will provide up to \$250,000 per grant.

Other Program Requirements:

- MTI Grant Focal Areas:
 - Extension of existing Transportation Demand Management (TDM) programs
 - Creation of new TDM programs
 - Creation and marketing of TDM Resources
 - Expansion of first mile/last mile programs
 - Support for employers and/or employees to adopt TDM measures (including incentives), in collaboration with an existing or new TDM program provider
 - Implementation of planned TDM programs (bike share, car share, microtransit, etc.)
- MTI grant performance metrics are focused on the following goals:
 - To improve mobility and access for transit dependent Vermonters
 - Reduce greenhouse gas emissions
 - Reduce the use of single occupancy vehicles

Applicants are requested to identify in their application which metric category(ies) they will be addressing and any targets they may have already identified. Applications should include details on how awardees will track MTI program performance metrics and report on their project outcomes.

VTrans State Highway Safety Office: Highway Safety Grants & Work Zone Safety Program

The State Highway Safety Office (SHSO), through funding from National Highway Traffic Safety Administration (NHTSA), works with partners to achieve progress “Toward Zero Deaths” by reducing the number of crashes, injuries, and fatalities on Vermont’s roads. The SHSO works to provide highway safety data and fact-based analyses that will assist communities and safety advocates in implementing effective programs that will change high-risk driving behavior and increase safety on our streets and highways. The SHSO distributes grant funds to state, county and local law enforcement agencies to work towards this mission.

Contact your local municipal police department or sheriff’s office, or

Grant funds issued to qualifying agencies under the Occupant Protection grant can be used to patrol work zones to improve safety and reduce work zone injuries and fatalities.

Grant Details:

Contact your local Sheriff’s Office or municipal police department to inquire if they have an active Occupant Protection grant with the SHSO. If they have an active grant and have grant funds remaining, you may request that they patrol a specific work zone location.

Other Program Requirements:

The SHSO has a variety of other programs that your local police department may use to combat highway safety concerns you may experience while working on the roads, such as drunk and impaired driving, distracted driving, seat belt use, community traffic safety problems, pedestrian and bicycle safety, and motorcycle safety. For more information visit our website at:

Vermont State Infrastructure Bank (SIB)

The State Infrastructure Bank (SIB) program, operated by the Vermont Economic Development Authority (VEDA) in conjunction with the Vermont Agency of Transportation and the Federal Highway Administration, is available to assist in the construction or reconstruction of highways, roads and bridges, as well as certain facilities related to rail transit. Also, in certain cases, electric vehicle charging stations, and natural gas refueling stations available for public use are eligible for SIB financing.

Contact your local VEDA office

(802) 828-5627

Info@veda.org

Eligibility

- Municipalities, regional development corporations or political subdivisions of the state.
- Private sector companies that have entered into a contract with a public authority to carry out a qualified project.

Use of Proceeds

Projects eligible under Title 23 or Title 49 of the United States Code of Regulations, such as:

- Construction or reconstruction of highways, roads and bridges, and pedestrian facilities.
- Construction of certain rail transit or public transit facilities.
- Construction and/or installation of electric vehicle charging stations and natural gas refueling stations available for public use.

Loan Rates and Terms

- 3% fixed for loans to private sector borrowers.
- 1% fixed for loans to municipal-type borrowers and for electric vehicle charging stations;
- Loan term may not exceed 30 years with repayment commencing no later than five years after completion of project; loan terms for electric vehicle charging stations will depend on available cash flow.
- Required borrower equity contribution to project is 10-20%.

Fees

- 2% commitment fee
- \$50 credit report fee (if applicable)
- \$18 flood insurance certificate (if applicable)
- Appraisal reimbursement (if applicable)
- Document recording/discharge fees
- No application fee

Vermont State Infrastructure Bank (continued)

Application Process

- All loan decisions are made by the SIB Board of Directors.
- All federal and state environmental permits and other approvals must be obtained for SIB projects.
- Applicants are advised to discuss their proposed project with SIB Staff prior to submitting the application.
- Vermont State Infrastructure Bank applications may be obtained from the VEDA office.
- Please contact VEDA to begin the SIB application process.

Other Notes

Sometimes, in the case of a project on a roadway classified as part of the federal aid system (FAS), Municipalities can usually borrow from the SIB to cover either 80% of a local project or to cover any local-share that has been required for a VAOT-directed project.
