

Hello,

Offering my support for a two year inspection in Vt. Current inspection criteria seemed to be always a safety issue, and now the focus (in my opinion) is emissions. In both instances I believe it is an affordability (another) issue in this state especially when referring to later model cars/vehicles, example is all the states that do not have such an onerous and expensive regulation to keep a vehicle on the road.

Please repeal or at least change to a two year requirement for the state of Vermont.

Thank you,

Andrew Melville
