

As I understand it this bill has a rule proposed that would prohibit companies from inspecting their own vehicles. This would be an extremely detrimental blow to the small companies in VT. It is so difficult now to get outside vendors to even service equipment without long wait times. I also assume this rule would apply to Towns and the state vehicles? That would be an extreme burden on them as well.

If someone is inspecting vehicles that are not legal, then take that person/companies ability to inspect

Thanks for your consideration,

Jordan Weidman
